

Process header template creates a box with title, section and two references. This template is meant to be used at the top of a page. Fill in any relevant information and leave unknown or inapplicable parameters empty. Don't remove unused parameters, as these help editors use the template elsewhere.

Usage

```
{{process header
| title
| section
| previous
| next
| shortcut
| notes
}}
```

This template is meant to be used at the top of a page in the Foresight Wiki namespace. Fill in any relevant information and leave unknown or inapplicable parameters empty. Don't remove unused parameters, as these help editors use the template elsewhere.

Example

```
{{process header
| title      = Title
| section    = Section
| previous   = Previous
| next       = Next
| shortcut
| notes      = Notes
}}
```

produces

Previous **Title** Section Next
Notes
