Usage

Guts: `{| style="background:{{{2}}};" | <span style="color: {{{1}}}">{{{3}}}</span> |}`

Sets foreground and background colors of a given text. They can be specified by name or in the format #ddddd (RGB hex triplet).

Unless in the case of personal use on a user page, use this template with great caution:

- a poor contrast may make the text difficult or impossible to read
- the contrast can be experienced as even poorer in the case of color blindness
- links have a color according to user settings; they become invisible if this color is equal to the background color

Examples

`{{col#ffffffl#000000lFrom FORwiki, the romanian foresight website.}}` gives:

From FORwiki, the romanian foresight website.

`{{col#aa0000l#009999lFrom FORwiki, the romanian foresight website.}}` gives:

From FORwiki, the romanian foresight website.

`{{colwhitelblacklFrom FORwiki, the romanian foresight website.}}` gives:

From FORwiki, the romanian foresight website.

`{{colyellowlgreylFrom FORwiki, the romanian foresight website.}}` gives:

From FORwiki, the romanian foresight website.

`{{colbluelsilverlFrom FORwiki, the romanian foresight website.}}` gives:

From FORwiki, the romanian foresight website.

`{{colgreylyellowlFrom FORwiki, the romanian foresight website.}}` gives:

From FORwiki, the romanian foresight website.

{{colblacklaqualFrom FORwiki, the romanian foresight website.}} gives:

From FORwiki, the romanian foresight website.

Standard color names

The HTML 4.01 specification defines sixteen named colors, as follows:

Color	Hexadecimal	Color	Hexadecimal
black	#000000	silver	#c0c0c0
gray	#808080	white	#ffffff
maroon	#800000	red	#ff0000
purple	#800080	fuchsia	#ff00ff
green	#008000	lime	#00ff00
olive	#808000	yellow	#ffff00
navy	#000080	blue	#0000ff
teal	#008080	aqua	#00ffff
